

Subnational Governments & Outstanding Nature

Thomas Brooks
Chief Scientist, IUCN
@IUCNscience

Red List Index of species survival, 1993–2020, and projections for 2021–2030 (based on a business-as-usual extrapolation of the global indicator)

“We will create a digital **platform** where all parts of the Union can voluntarily share their planned and realised contributions to meeting the Impact Targets as well as towards global policy targets such as the post-2020 global biodiversity framework and the Paris Agreement on Climate Change. This mechanism to document, and ultimately report on, contributions from the IUCN membership, National and Regional Committees, Commissions and Secretariat must be as light as possible (otherwise it will not be used), build on available information, be spatially explicit, be considerate of restrictions and reservations to share such information, provide maximal benefits to all users, and yield the most informative documentation possible. By doing this we can truly show the strength of the Union.” (Section 8, page 21).
